

Material Polyester

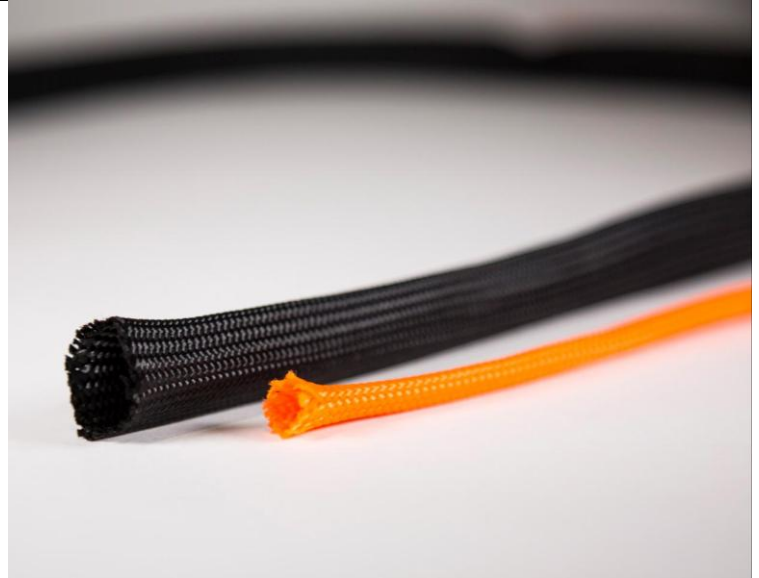

Version 1.1 | Datum 03/2026

Field of Application

Product Description

The PET braided sleeve is manufactured from polyester multifilaments that withstand both high thermal and mechanical stress. It is ideally suited, for example, for safely bundling cables and wires.

Material Data

Base material	Polyester Multifil
Braid type	Round braid

Technical Properties

Properties (Material)

Weight	Low
Tensile strength	High

Thermal Properties

Standard	-50° to 120°C
Shortly	150°C

Additional Product Details

High strength
Good elasticity
Flame-retardant version available upon request

Dimensiones

Nominal diameter	0,5mm up to 100mm
Wall thickness	Variable

Processing: Hot cutting recommended to prevent fraying at cut edges/ends

Delivery form: Cardboard spool, wooden reel, plastic reel, cable drum

Presentation: Continuous length
